

Parasite Cleanse

(Hulda Clark's Parasite Formula, used with permission)

These herbs should be taken on an empty stomach (i.e. before you eat)

In addition:

- you should take 500 - 1,000 mg of [vitamin C](#) with each meal (kills botulism)
- don't eat anything with artificial *anything* in it
- throw out personal care items with "prop" or "propyl" anything as ingredients (isopropyl alcohol makes it easier for parasite eggs to "hatch")
- get any commercial cleaning products, poisons, etc, out of the house (store in an outdoor shed or somewhere the fumes can't get into the house, preferably not an attached garage)
- avoid food with flavorings or colorings; make your food from scratch as much as possible
- no eating leftovers – there is ALWAYS at least some mold in them
- use a [non-fluoride toothpaste](#) or plain [baking soda](#) (aluminum-free) to brush your teeth
- no caffeine

This parasite cleanse is recommended for persons with serious health conditions.

For a generally healthy person, follow the first 14 days of this program, and do it once a year.

A two week cleanse for 1 person calls for 1 [Black Walnut](#) (extract from fresh green walnut hulls), 1 [Wormwood](#), and 1 [Cloves](#).

Some cases of tapeworm require the addition of [Rascal](#). Use as directed.

There are two more supplements that are very helpful (although optional) while killing parasites. The amino acids [Arginine](#) and [Ornithine](#) both help your liver to break down the ammonia produced by dying parasites. Don't buy the combination; get them separately.

Try an Arginine capsule instead of caffeine in the morning.

For sleep, take up to 6 Ornithine capsules before bed time.

My best description of excess ammonia: Every cell in your body feels frenetic!
